Prof. Alan Turing
Department of Computing
University of Manchester
Manchester, M13 9PL
United Kingdom

8th April 2026

Dear Prof. Turing,

Unofficial WHU School of Robotics Letter Template

I am writing to share the unofficial LaTeX letter template for the School of Robotics at Wuhan University. This template is adapted from the Oxford Mathematical Institute letter class, designed to provide a clean and professional layout for academic correspondence.

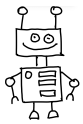
The template maintains the official visual identity of the university while offering the flexibility of LaTeX. Key features include:

- **Official Branding:** Includes the Wuhan University logo.
- **Custom Footer:** Automatically includes contact details and address.
- **Easy Configuration:** Users can easily update their personal information in the preamble.

To use this template, simply edit the sender's information in the source file, including the address with the `\schooladdress` command, and compile it using either `pdfLaTeX` or `XeLaTeX`. It supports standard LaTeX commands for equations, tables, and figures.

I hope this tool proves useful for students and faculty members in their daily communications.

Yours sincerely



Lai Wei
Undergraduate Student, School of
Robotics
